ORDER:

In the G.O. read above, the Government sanctioned the Scheme for Scientific aid to Pepper Industry with certain staff which is partly financed by the Indian Council of Agricultural Reasearch. This Scheme was placed in charge of the Goernment Mycologist stationed at Coimbatore for guidance and supervision. The Indian Council of Agricultural Research has since stated that it is observed from the technical programme of the scheme that mycological work forms a minor * part-only one of eleven items that and the other items of work relate to survey and collection, hybridization, varietal trials, cultural practices, manurial requirements, physiology etc., which are all of botanical nature. The Council has, therefore, suggested that in the interest of the efficient supervision of the scheme, the control of the scheme may be transferred from the Government Mycologist to one of the appropriate Crop Specialists. The Director of Agriculture has agreed to this suggestion and recommended that the scheme may be placed in charge of the technical control of the Oil Seeds Specialist, Coimbatore as the latter is working on perennial crops and it will lead to greater efficiency if he is also in charge of research work on pepper. Government accept the recommendation of the Director of Agriculture and direct that the Scheme for Scientific aid to Pepper Industry be placed under the technical control of the Oil Seeds Specialist, Coimbatore for guidance and supervision with effect from the date of the receipt of this order.
